

ESMIG

Secure access to the TARGET services

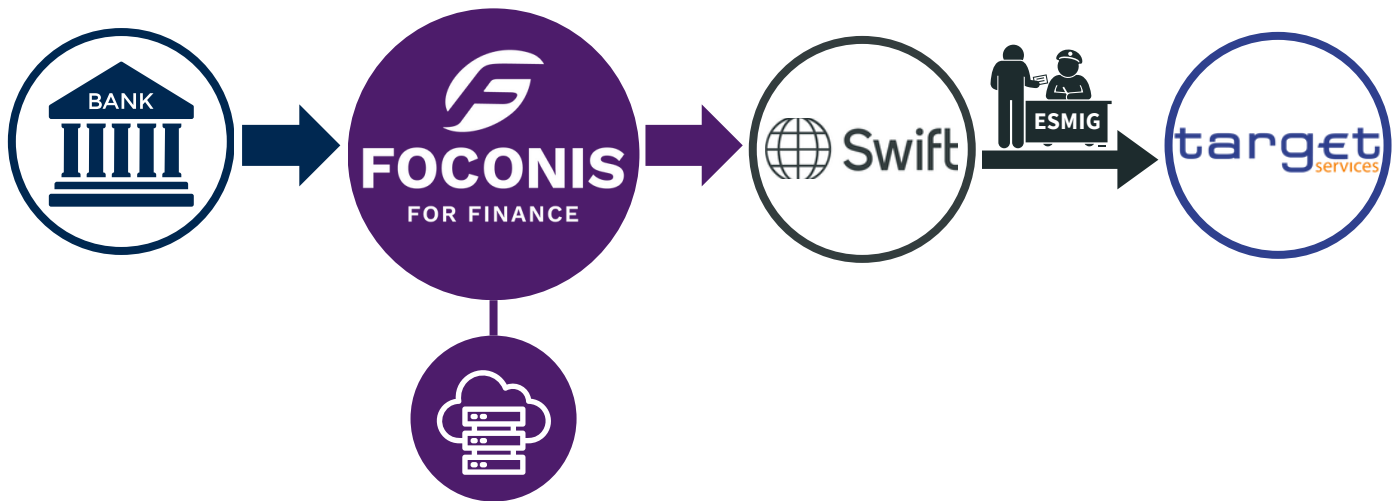

The Eurosystem Single Market Infrastructure Gateway (ESMIG) is the central, technical access route to the Eurosystem's TARGET services. Foconis Payment supports financial institutions and banks with the connection and technical implementation by providing the necessary infrastructure, excellent services and professional expertise.

The connection to the ESMIG is made exclusively via the authorised Network Service Providers (NSP) Swift or Nexi-Colt.

SERVICES

- ✓ Provision and operation of the certified Swift shared infrastructure in ISO2700-certified data centres
- ✓ Swift onboarding by Foconis Payment Swift experts
- ✓ Support with registration for participation in ESMIG and the TARGET services
- ✓ Fulfilment of the requirements of the Swift Customer Security Controls Framework (CSCF)

TARGET CONNECTIVITY

ADVANTAGES

- ✓ Total Cost of Ownership (TCO): Cost efficiency and potential savings
- ✓ Complete outsourcing of security-relevant IT processes
- ✓ No additional resources required
- ✓ No additional expertise required
- ✓ Standardised and fast project implementation
- ✓ Standard contract and service level agreement (SLA) for the defined services
