

IAM* - Interface

Automated user management for PPM

Banks are required to fulfil strict reporting and notification obligations to the German Federal Office for Information Security (Bundesamt für Sicherheit in der Informationstechnik - BSI). With its 'Rundschreiben zu bankaufsichtlichen Anforderungen an die IT' (BAIT), the banking supervisory authority BaFin sets clear standards for the technical and organisational equipment of institutions. These requirements primarily relate to the management of IT resources and IT risk management. Particular attention is paid to authorisation management, which must comply with the Minimum Requirements for Risk Management (MaRisk).

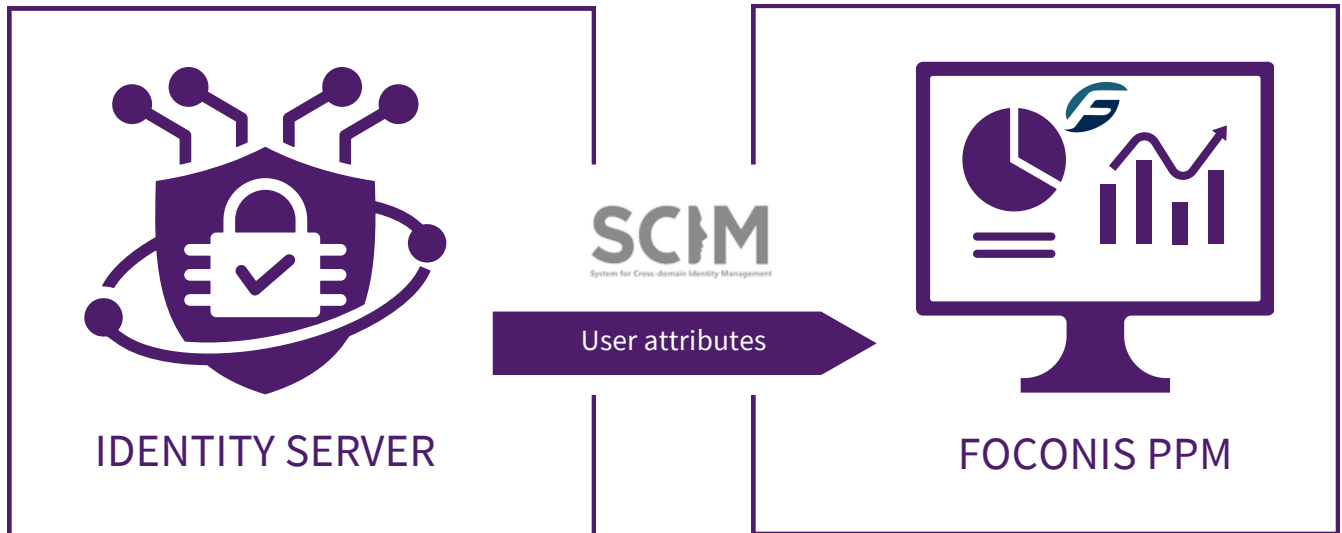

Foconis Payment uses a standardised physical interface (SCIM) to automatically access a bank's internal IAM system to the user management of PPM.

*IAM-System = Identity- & Access-Management, Software for authentication and authorisation of users

FEATURES

- ✓ Regular synchronisation of PPM user rights with the internal IAM system
- ✓ Simple transfer of rights changes to PPM (e.g. when joining, leaving or changing jobs)
- ✓ Reduction of inconsistent rights assignments
- ✓ No need for double maintenance

PLUS POINT FOR SAFETY

ADVANTAGES

- ✓ Increased security through role-based access rights
- ✓ Compliance with regulatory requirements
- ✓ Increased efficiency through automated processes
- ✓ Improved user experience
- ✓ Increased protection for sensitive data
- ✓ Risk minimisation for fraud attempts
